
So Flo Floods – 2019/2020 Competition

TheoEco Institute (TheoEco.org) is engaging South Florida with its new documentary *So Flo Floods* which premiered at the Miami Beach Cinematheque on Father's Day. Our goal is for folks throughout South Florida to learn from the film's experts; authorities like historian Paul George, UM professors Wanless and Weisskoff, SFWMD's Jacqui-Thurlow-Lippisch, author Robert Mykle, and others.

TheoEco is reaching out to students in the *So Flo Floods* locales to create essays, exhibits, and explorations of topics in the film related to:

STEM (Science Technology Engineering Mathematics)

Miami Beach's experience in particular is central to *So Flo Floods'* illustration of what flooding means to South Florida today. Science, Technology, Engineering, and Math are central to all these things.

Art

The film contains new video, vintage photos, aerial shots, animation, sculptures, memorials, sweeping footage, and more. We need *new* works that capture the past, present, AND FUTURE of South Florida.

Writing

Killer 'Cane's firsthand accounts capture the horrors of the 1928 Hurricane on Lake Okeechobee's Glades communities that killed thousands. There are so many stories left – both fiction and non-fiction.

Winners receive: \$250-1st place; \$150-2nd place; \$50-3rd place and will receive assistance to further develop their project over the rest of the school year. Submissions are due by end of day May 15, 2020. Winners will be announced at a special Facebook Live screening of the film on Friday May 29, 2020 at 2:30 PM.

- Entries will be judged based upon originality and the contribution the entry makes for a greater understanding of topics raised in the film.
- Opportunities for feedback on project ideas and works-in-progress will be available throughout the competition.

For more information and submissions go to: TheoEco.org/competition.html.

About TheoEco Institute, Miami Beach Senior High School, and the CEC

TheoEco and Miami Beach Senior High are partners through our mutual relationship with the **Council for Educational Change Executive Pass Program** (changeeducation.org) which brings together school leadership and businesses to work together for schools.

Topics include:

- Infrastructure degradation
